Switches In Grey Or White.  
Eikon Coverplates: Classica – Square Edge / Rondo – Rounded Edge  
Switches In Grey, White or Silver.

## TYPICAL BUSS / POWER SCHEMATIC

The **By-Me System** uses a simple twisted pair shielded cable as the BUS, carrying communications and power connection to tie all system components together.

**Access To the Control System** – can be accomplished through multiple technologies; biometrics, smart cards, phone, switches, infrared remote, voice or motion sensors among others.

**SEE MORE** - online at [www.drsa.com](http://www.drsa.com) or you can request a complete **By-Me Marine** Catalog.

## What is By-Me Marine?

For some it may be something as simple as remote or automatic control of a few lights. For others, security may be the central application. Still others may choose to install advanced controllers or use voice recognition. As a very basic definition, we tend to refer to the **By-Me Marine** system as anything that gives you remote or automatic control of systems aboard your vessel. The **By-Me Marine System** integrates all of the basic functions of electrical and electronic systems in a simple and effective manner.

With the programmable infrared multi-function remote control you can manage functions.

Infrared Receiver w/Remote

Automation Control Panel

This is the heart of the system, all functions are managed and programmed from here by navigating through the display in a straight forward user-friendly manner.

By-Me Manages

Lights and automation controls. Groups of lights and groups of motorized devices are controlled from here.

Idea - Rondo

Eikon - Rondo

Idea - Classica
